Gift of Jack McLeod 2011

Extent: 5 boxes (1 metre)

For a very serious Professor in Political Science, Jack MacLeod is a very funny man. We readers are lucky that Jack put in the ten hard years of writing it took to complete his novel [Uproar](#). The parts that are fiction are very, very funny. And the parts that are fiction built up around the skeleton of fact are fascinating: a window on the real- life, almost-gone days of the smoke-drenched tweedy Toronto writers/academics of P.O.E.T.S. (read the book to see what that stands for!) meeting at Dooley's for martinis or beers and to bat around matters of importance or ideological flirtation. His characters' discussion of Marshall McLuhan's ideas shimmer, especially when it is pointed out that the best source for an accessible McLuhan primer was to be found in an interview contained in an issue of [Playboy 1969!](#)

Jack MacLeod (aka McLeod) was born in Regina, Saskatchewan in 1932. He earned a BA and MA in Economics from the University of Saskatchewan before taking a PhD in Political Science at the University of Toronto where he taught from 1959-1996.

An experience in Budapest during the Hungarian Revolution in 1956 led him to begin writing political journalism, some of which appeared in the *Globe and Mail*, the *Toronto Star*, *Saturday Night*, *Books in Canada*, *Canadian Forum* and the *Journal of Canadian Studies* as well as on the CBC. MacLeod published several academic works with the U of T Press, Oxford University Press and McClelland and Stewart and two political science text books. His two previous novels, *Zinger and Me* and *Going Grand* were on bestseller lists. Jack MacLeod is currently professor emeritus in the Department of Political Science at the University of Toronto.

Jack MacLeod's first two novels, *Zinger and Me* and *Going Grand*, both published by McClelland & Stewart in the late 1970s / early 1980s, established him as that rare thing, a writer who could be funny while also dealing with ideas and social issues. *Uproar*, his long-awaited new novel, is the story of a marriage in free fall, a career on the skids and the era we have just passed through. Included among the zany list of characters is Zinger (Francis Z. Springer), the remarkable creation who made an appearance in MacLeod's two earlier publications. Don Harron has called Zinger "one of the most memorable character's in Canadian literature"
